## Class 1 Puppy Dog 4 (1 abs)

1. Bower & Georgiades's **Tabanyaruu Kantri Aleks**, Very nice type, good quality coat. Nice head for age on male. Good bones and chest for age. Lovely tipped ear. Little narrow moving behind and loose in front. Nice angulation and good side movement. Expression is nice, overall appearance shows dog is male. Lovely temperament, BPIS.
2. Orr's **Bridus Rakas**, Very good quality coat. Very nice chest for age. Muzzle should be more cushioned as is little snipey. Stop should develop with age and head broaden. Nice angulation behind but should be better in front. Bone could be better. Good Side movement and tail. Little loose moving in front but ok behind. Nice temperament.
3. Bright's **Alkantara Ilolasson**, Very nice head but little bit round eyes. Good bones and good quality of coat. Should have better angulation in both front and rear and moves with elbows in under dog. Needs to be better behaved when handled by judge, affected placing. Behaviour improved in second class. Because of poor angulation movement is short striding.

## Class 2 Junior dog 4 (2)

1. Pashley & Morrison's **Elbereth Miskakarhu**, Excellent type. Nice head for age. Nice dark eyes, little round. Good ears and full of coat inside. More stop and broader skull should come as matures. Excellent proportions, good chest for age. Very good quality of coat and good feathering on legs. Enough bone. Good tail. 2. Kosla's **Elbereth Tarmo JW**, Nice strong type and clearly masculine. Strong muzzle but should have better underjaw. Stop is adequate but prefer more padding in cheek. Good bones, but angulation could be better. Should

not be any longer in body for male. Good chest, very good quality of coat. Stands with elbows a little bit under dog. Nice side movement, balanced front and rear, but close front and rear. Nice temperament.

3. Crowhurst's **Lappvikens Mika**, Nice type, but should be little more masculine. Nice dark eyes could have better stop. Good ears. Prefer longer rib cage. Nice angulation behind. Could be better in front. Nice quality of coat but dog is not in full coat. Side movement ok and rear movement, but very narrow in front.

Tends to stand with hind legs tucked underneath. Good tail. Nice temperament. The dogs overall picture is excellent, RBD.

2. Mowatt's **Lecibsin Salo of Tabanyaruu JW**, young male who could be more clearly defined as masculine. Good head for age, prefer more underjaw. Good quality of coat, but lacking under coat, which slightly spoils overall picture today. Nice angulation behind, could be better in front. Enough bone for size of dog. Nice side and hind movement but little loose in front as expect with age. Immature. Lovely temperament, and beautifully shown.

3. Moore & Etches' **Morval Fire Kracker**, Bigger than middle of size. Male with excellent dog shape, and lovely strong bones. Muzzle should be a little shorter and cushioned. Would prefer more defined stop and rear skull. Nicely angulated front and rear. Good chest. Firm behind strong hind quarters. Good coat quality though not in best of coats. Lovely feathers on legs and hocks.
